

DGM Africa Regional Workshop

The Dedicated Grant Mechanism (DGM) is a financing window under the Climate Investment Fund's (CIF) Forest Investment Program (FIP), dedicated to enabling the full and effective participation of Indigenous Peoples and Local Communities in the global effort to reduce deforestation and forest degradation. To do this, the DGM includes 14 FIP country projects and an overarching global project.

The DGM Global Project serves an umbrella function. It focuses on *promoting knowledge exchange, networking, facilitating global communications, and measuring results* of the entire DGM Program. The Global Project also provides Secretariat services to the DGM Global Steering Committee. *Conservation International* was selected through a competitive bidding process to implement the DGM Global Project as the Global Executing Agency (GEA).

An overarching goal of the Global Project is to *increase IPLC skills in technical and policy topics* related to REDD+, enhancing their participation in FIP and REDD+ at the *regional and global* scales. The GEA plans to conduct regional workshops and global workshops on technical and policy topics related to REDD+. The geographic scope of the Global Project's knowledge sharing activities includes IPLCs from DGM countries in addition to IPLCs from non-DGM countries.

Workshop objectives:

- Strengthen the capacity of Indigenous Peoples and Local Communities (IPLCs) to participate in the Forest Investment Program and other REDD+ programs at local, national and global levels.
- Strengthen the networks and alliances of IPLC organizations within and across Africa region with a view to enhancing their representation and voice in regional and global policy fora.

Dates: July 19-23 2016

Country: Burkina Faso

Number of participants: 35

Country participants:
